SUMMARY

Computer Science graduate of Universitas Lampung (GPA 3.67, Cum Laude) experienced in building fullstack applications running in production: a campus administrative services platform (Laravel, React) and a PPOB platform (Golang, PostgreSQL, Svelte). Used to working in developer teams, from database schema design and REST APIs to third-party integrations and web interfaces.

SKILLS

Programming Languages: PHP, Golang, JavaScript, Kotlin.

Frameworks & Libraries: Laravel, React, Svelte, Fiber (Go), Tailwind CSS, Jetpack Compose.

Databases: PostgreSQL, MySQL, MongoDB.

PROJECTS

Saidata - Campus e-ULT | Fullstack Developer **Nov 2025 - Jul 2026**

Integrated campus administrative services platform for Universitas Lampung (Laravel, React, PostgreSQL, Redis), live in production. Team of 6 developers.

- Built a dynamic, hierarchical service menu system with access control per unit, faculty, and study program, including Redis sidebar caching with automatic invalidation.
- Built the multi-stage validation workflow (database schema, service layer, React UI) with parallel validator voting and unit-scoped access.
- Integrated campus SSO (CAS) and the Siakadu API to automatically map student, lecturer, and staff identities, handling duplicate NIP merging and Redis-cached profile photo proxying.
- Migrated the database from MongoDB to PostgreSQL and refactored 4 organizational tables into a single hierarchical units model.
- Wrote PHPUnit automated tests covering activity logging, the variable system, and the math evaluator.

Doripay - PPOB Application | Software Developer **Dec 2025 - Jun 2026**

PPOB platform live in production (Golang, PostgreSQL, Svelte, Tailwind CSS), built on Clean Architecture.

- Developed real-time notifications using Server-Sent Events on the Golang backend, using sync.RWMutex for a concurrent client map and a goroutine worker pool with a buffered channel.
- Built an end-to-end admin transaction management feature (status, date, and search filters, pagination, aggregate stats) across all Clean Architecture layers, plus its Svelte page.
- Integrated a WhatsApp gateway for registration OTP and automatic group alerts when supplier prices (Digiflazz, OrderKuota) change during product sync.
- Built a Sales portal (dashboard, leaderboard, commissions, education materials) with multi-territory content targeting and RBAC-based access, and fixed a profit calculation bug in financial reports.

WORK EXPERIENCE

Teaching Assistant - Universitas Lampung **Feb - Jun 2026**

- Managed practicum sessions for System Analysis & Design and Mobile Application Technology courses.
- Guided students in Android application development and system modeling, and handled technical troubleshooting.
- Evaluated assignments, provided software design feedback, and prepared learning materials.

Internship (PKL) - Telkom Insfrastruktur Indonesia Sub District Lampung | Data Management **Jun - Aug 2025**

- Entered customer network infrastructure data into the internal system.
- Validated and cross-checked data to ensure the accuracy of operational records.

ORGANIZATIONAL EXPERIENCE

Head of Media and Information - BEM FMIPA Unila **Mar - Dec 2025**

- Led a creative team in designing and executing the organization's digital communication strategy.
- Managed social media publications and collaborated across departments for program promotion and branding purposes.

Secretary of Media and Information - HIMAKOM Unila **Mar - Dec 2024**

- Managed supporting administration and correspondence, and maintained documentation to ensure smooth divisional operations.
- Coordinated internal communication and assisted in planning the digital content publication flow.

EDUCATION

B.Sc. in Computer Science - Universitas Lampung | GPA 3.67 (Cum Laude) **2022 - 2026**
